EDUCATION

University of Europe for Applied Sciences
B.Sc. Software Engineering
2023 - 2026

Escuela Alemana San Salvador
High School Diploma
2008 - 2022

SKILLS

BACKEND

- Python (FastAPI, SQLAlchemy)
- Java (Spring Boot, JPA)
- TypeScript (NestJS)
- REST API design
- SQL (PostgreSQL, Oracle)

TESTING & QA

- Automated tests (JUnit, Mockito)
- Functional & regression testing
- Test case design
- Defect reporting

TOOLS

- Git & GitHub, Docker
- Swagger / OpenAPI
- Jira, Xray, Azure DevOps
- DBeaver

LANGUAGES

Spanish	●●●●●	Native
English	●●●●○	C1
German	●●●○○	B2
Portuguese	●●○○○	Basic
Japanese	●●○○○	Basic

SUMMARY

- Software Engineer (B.Sc., 2026) focused on backend development with Python and Java, with professional NestJS experience and a solid grounding in SQL.
- Builds REST APIs with FastAPI and Spring Boot, including business rules, data validation, and automated tests.
- QA experience on an enterprise retail implementation (Oracle EBS, Infor WMS) brings a strong eye for edge cases, data integrity, and system reliability.
- Trilingual: Spanish (native), English (C1), German (B2).

PROJECTS

StockFlow · *Java, Spring Boot, PostgreSQL* github.com/Charlie2M/stockflow

- Multi-store inventory REST API: supplier deliveries, per-store stock levels, and transfers between stores, with every movement recorded in an audit ledger.
- Guarantees that stock never goes negative under concurrent requests and that transfers ship completely or not at all, each covered by automated tests (JUnit, Mockito, MockMvc).
- Flyway migrations, standardized error responses (RFC 9457), OpenAPI docs, Docker, and CI with GitHub Actions.

Game Stats API · *Python, FastAPI, SQLAlchemy* github.com/Charlie2M/game-stats-api

- REST API for a gaming community: player registration, session logging, aggregate stats (win rate, K/D ratio), and a leaderboard filterable by game.

LFGBot · *Python, discord.py* github.com/Charlie2M/lfgbot

- Discord bot with slash commands that posts looking-for-group requests and opens a dedicated thread for each one.

PROFESSIONAL EXPERIENCE

APRIL 2026 - SEPTEMBER 2026

Software Test Analyst

Tecnoin, Flying Tiger project for Siman

- Designed and executed functional tests for retail and warehouse processes (goods receipt, store transfers) across Oracle EBS and Infor WMS integrations.
- Wrote SQL queries against Oracle databases in DBeaver to validate data integrity between systems.
- Documented and tracked defects in Jira and Xray, working with developers and functional consultants.

JULY 2025 - NOVEMBER 2025

Quality Assurance Intern

Allied Global

- Executed functional and regression tests to catch defects before release.
- Logged, prioritized, and tracked defects through resolution with development teams.

MAY 2025 - JULY 2025

Back-End Development Intern

Universidad Centroamericana José Simeón Cañas (UCA)

- Developed backend features and REST API endpoints for a web application using NestJS (Node.js/TypeScript).
- Implemented and tested server-side business logic for core application functionality.
- Supported integration of services and data flows between system components.

MARCH 2025 - JULY 2025

Quality Assurance Intern

Applaudo

- Executed functional and regression testing to support release readiness.
- Created and maintained test cases in Jira aligned with product requirements.

AUGUST 2022 - DECEMBER 2022

Operations Intern

Airline MRO Parts

- Documented internal processes and standardized reports to improve information accuracy.
